The Intelect Legend XT™ is one of the most advanced therapy systems available. Beneath its award-winning, ergonomic design is a sophisticated, versatile, user-friendly system. The Intelect Legend XT lets you offer a comprehensive range of therapies in a single, state-of-the-art unit.

- Patented award-winning, ergonomic modular design
- Easy-to-add modularity allows the addition of two additional channels of electrotherapy, light therapy or a battery module
- High contrast 5" (13 cm) FSTN LCD monochromatic user interface
- Two independent electrotherapy channels, expandable to four independent channels
- Multiple waveform electrotherapy-six clinical waveforms: Interferential, Premodulated, High Volt, Russian, Symmetrical Biphasic and Microcurrent
- Documentation of treatment data with Patient Data Cards
- User defined protocols for your specific needs
- Dual frequency ultrasound at 1 or 3.3 MHz
  » Pulsed or Continuous Duty Cycles (10%, 20%, 50% & 100%)
  » Four ergonomically designed soundhead applicator sizes: 1 cm², 2 cm², 5 cm² & 10 cm²
  » Watertight soundheads for use in underwater therapy
- Therapy System Cart maximizes storage of clinical supplies and organizes cables
- Optional Operator Remotes allow treatment stop, start and pause, as well as change in amplitude at any time during a treatment session. Each remote is color-coded for designation between channels (shown at right)

Patient Data Management System

Patient Data Management System (PDMS) is a unique, time-saving optional software program that lets you organize, store, display, compare and print patient treatment information captured on Patient Data Cards to your PC. Pain map profiles are recorded using a numeric pain index, Visual Analog Scale (VAS), and pain mapping for each patient. Electrode placement diagrams, treatment area diagrams and session notes can be created for each patient through PDMS. Includes software, card reader and five Patient Data Cards.

Patent # D513,615
Multiple Waveforms

Six essential clinical waveforms to manage a broad spectrum of clinical conditions: Interferential, Premodulated, High Volt, Russian, Microcurrent and Symmetrical Biphasic.
