## Zenith-Supreme™

### Full Body Treatment System

Incorporating a computer controlled & soundproof system, the "intellectually-controlled mechanical massage hands" will offer you a state of comfort, relaxation and therapy that you will truly enjoy.

How about an over-the-top computer-controlled Full Body Treatment ? The **Zenith-Supreme™** includes six different massage functions, such as Shiatsu, kneading, flapping, knocking, simultaneous kneading and flapping, and vibrating.

In addition, *the Zenith-Supreme™ includes six (6) one-button preset treatments that get you the results you need without spending wasted time programming the treatment like so many other models on the market require you to do.* Where else can you find a system that is fully adjustable and that automatically scans the massage point of the upper body and shoulder, and automatically offers massage for the upper body with a choice of three (3) optional areas of the entire body, the shoulder and neck, the back and waist.

How about an outstanding array of user-controlled **MANUAL Treatment functions?** The **Zenith-Supreme™** also offers **manual massage** for the upper body

in three (3) optional areas of the entire body, the shoulder and neck, the back and waist with your choice of five (5) massage modes which also provides five (5) levels of speed. When using the massage modes of flapping, shiatsu and knocking, you can easily adjust the three (3) levels of intensity of the message. All the while, your **lower body is being caressed and massaged by one or more or ALL of 69 air bags integrated into the system.**

How about a relaxing massage of your arms?

With the **Zenith-Supreme™**, arm massage functions are standard and offers two (2) vibrating massage functions for the back and for the buttocks and a full massage function of the calves with three (3) options of high, low and off, respectively.

How about a fully-integrated music and treatment experience that will satisfy? Well, the **Zenith-Supreme™** not only offers, as standard, an MP3 player and headphones, but that is just the beginning! **Zenith-Supreme™** offers a

**treatment that is completely integrated to the frequency of the music.** We start adjusting the intensity and speed of the back massage to react along with the high frequency of the music, and then we adjust the intensity of the buttocks vibration to react with the medium frequency of the music, and then finally, we adjust the intensity of the calf vibration to react with

the low frequency of the music. WOW!! The **Zenith-Supreme™** creates a treatment experience that is second-to-none! **Satisfied customers have begged us to consider incorporating this technology into a system built for 2 ... for that extra-special "shared" experience.** Of course the calf rest and backrest are electronically controlled with automatic functions built-in, and a thermo therapy unit with temperature control is also included.

Are there any options to consider? **No, No & No!** When you consider all of the wondrous functions that are already built-in to the **Zenith-Supreme™ Full Body Treatment System**, and take satisfaction in its ergonomic design that is comfortable, rich and classical looking, **you have a product that demands your attention to own it!**

The **Zenith-Supreme™** is the answer to your needs for a **Full Body Treatment System.**

Whether you install it in your home or your office, the **Zenith-Supreme™** will become your favorite retreat to relax, rejuvenate and repair yourself from the stresses of life.
